Neurologist

Southland Hospital, Invercargill, New Zealand

The impending retirement of one of our Neurology team creates this opportunity for you.

Southland Hospital is one of New Zealand's most modern. You'll have first class facilities and first rate peer support from a strong and collegial Neurology and Medical team across the Southern region (Dunedin and Southland Hospitals). The role is a generalist one and we will consider full or part-time options. Private practice opportunities exist.

Invercargill isn't a big city and the pace of life and lack of big city pressures reflect it. We're spoilt for educational, arts, cultural and sporting amenities and facilities. Up the road are the holiday playgrounds of Queenstown and Central Otago. Closer to home, Stewart Island, the Catlins and lakes, rivers, beaches, forests and mountains to explore or fish.

You must have completed your specialist training and be eligible for registration with the Medical Council of New Zealand. An attractive remuneration package, relocation assistance and CME allowance which allows travel, at least annually to northern hemisphere meetings is available.
