Hospital

Commence stroke
research project

VMO (Neurologist or General Physician) – Stroke Unit

For nearly 20 years, The Alfred has been providing leading edge clinical, teaching and research capabilities through our dedicated geographical acute stroke unit, ambulatory/outpatient services and secondary stroke trials. So if you're looking to progress your career within an environment committed to innovation and excellence, the time couldn't be better.

Fellowship of the RACP is essential, likewise a strong background in Stroke management. Experience in the

wider neurology environment, particularly research based activities would be highly regarded.

For a position description and to apply, please visit www.alfred.org.au/careers, select job search and enter reference No. 641041 in key word search.
