

**Central West Neurology & Neurosurgery
is the largest neurological centre
in rural NSW,
and positions are available for both
Permanent and Part-Time Neurologists**

Central West Neurology & Neurosurgery offers the full range of neurological and neurophysiological services and our neurologists have special interests in multiple sclerosis, neurodegenerative disease, headache, movement disorders and neurogenetics. Our centre is supported by state of the art MRI (three 3T MRI and three 1.5T MRIs) plus multi slice CT and nuclear medicine.

We have two neurologists based in Orange, other neurologists who come up regularly from Sydney, and visiting neurosurgeons. We hold regular clinical and neuroradiological meetings to discuss interesting cases; important to meet CPD requirements.

**We are looking for a resident neurologist, and/or regular
“fly-in, fly-out” part-time neurologists.**

Recently qualified neurologists would find working with us would be a great introduction to Neurology as we see such a diverse range of interesting cases, have excellent support services and have a proven track record in mentoring. We can arrange any schedule to fit in with your other commitments.

Orange, a vibrant young community, has a great atmosphere and is growing rapidly as the populations in metropolitan NSW realise what a great lifestyle is available here. The wine industry has more than 60 vineyards producing fine cool climate wines. There are wine and whisky bars, gin distilleries, boutique breweries, and the cafes and restaurants are chic and packed to capacity. We have good schools, a university campus, a regional art gallery, cinemas, a theatre, as well as Newcrest Mine, the second-largest underground gold mine in the southern hemisphere.

We are supported by experienced and competent neurophysiology and administration staff, and an MS support nurse to help manage complex treatment regimens. We have ongoing research interests and participate in international clinical trials.

If you are interested in joining our team, or would like further information, please contact Simon or Emma, or our Practice Manager Sue Gentles.
