<b>Website</b>	<a href="http://www.health.nsw.gov.au">www.health.nsw.gov.au</a>

### PRIMARY PURPOSE

- This position is for doctors with FRACP qualification or equivalent with interest in Neurology and/or Immunology.
- The candidate will be part of the Neuroimmunology team at the John Hunter Hospital, the principal neurological referral center for Newcastle, Lake Macquarie and Northern NSW. The clinic looks after over 1100 people with MS, MOGAD and NMO. The clinic is run by two MS specialists and has two MS nurses to assist the clinical management. The position gives the candidate the possibility to learn about the spectrum of neuro-immunological diseases, multidisciplinary care of patients, management of immune therapy as well as symptom control. The candidate will also have simple procedural commitments including lumbar puncture and intrathecal baclofen pump refill clinics. The clinic has a strong research focus and the opportunity is given to be part of existing projects and clinical trials and to develop their own project including the opportunity to pursue a PhD. The candidate will be part of the department of Neurology and can participate in the on call roster for general neurology and stroke.

### ESSENTIAL REQUIREMENTS

Generic content:

- MBBS or equivalent, currently registered (or eligible to be registered) with the Medical Board of Australia in an appropriate registration category
- Successful completion of FRACP Medicine exam
- Current medical registration in Australia
- Demonstrated experience and commitment to education and teaching of junior medical officers, nursing and allied health staff
- This position is subject to an appropriate supervision level which can be supported by the health agency. If the incumbent's registration conditions include supervision requirements, the level of supervision must be able to be supported by the health agency for this role.
- Valid Working with Children Check
- Cleared National Police Check
- Aged Care Check for Australian Government funded positions

- Compliance with NSW Health Policy Directive PD2018\_009 for Occupational assessment, screening and vaccination against specified infectious diseases.

## KEY ACCOUNTABILITIES

- Neuro-immunological outpatient clinic sessions
- Management of patients in ambulatory care setting
- Assist management of people with MS as inpatients
- 
- Participating as sub-investigator in interventional trials
- Liaise with MS nurses, other units and hospitals within HNELHD, GP and on call neurologist
- Liaise with research team in HMRI
- Educate and update on Neuro-immunological advances

## KEY CHALLENGES

- Working in a multidisciplinary team
- Being a good communicator
- Caring for predominantly outpatients from a large region
- Being proactive with regards to research projects

## KEY RELATIONSHIPS

- General physicians
- Allied Health
- NDIS
- Other subspecialties
